

Securing Knife construction options

Securing steel rule blades into dieboard bases is critical when certain materials have a tendency to pull the knife out. Sharples has many solutions to solve this problem.

Rule flags

Oval holes to screw in dies for cut in place

When a part is deep and cutting a thru diebase for part clearance will not provide enough room for the part ask for clips.

Sharples can provide dies with inside or outside. Also ideal for End of Arm pushers for down stackers.

Clips inside
